

I-FIND Starter Package

**Site License
for only \$4,500 !!**

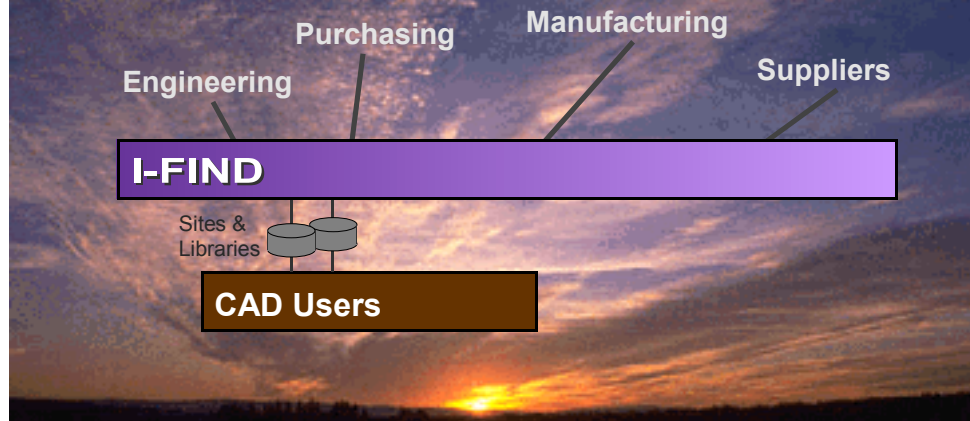

What if Purchasing could get parts delivered faster? What if Manufacturing could look at up-to-date engineering data? And Engineering managers could conveniently track status for the released product? And Suppliers were really a part of the team?

**Unleash your CAD data to
the Enterprise...
— today! —
with I-FIND™,
the outrageously easy,
fast, and economical
Mini-PDM System.**

Distribute Your CAD Data Across the Enterprise Horizon

For every CAD user in your organization, there are likely 5-to-10 people eager to access and view the design data. Now with the I-FIND engineering portal, they can all access drawings, parts and assemblies... right from their web browser and without having to learn any of that CAD stuff!

With the I-FIND Starter Package you get a site license to the I-FIND search engine and design browser, plus these productivity extensions:

- ◆ view drawings in PDF format (including on-the-fly generation)
- ◆ automatic plotting of "watermarks" that underlay released drawings
- ◆ "one-button" plotting invoked from your web browser
- ◆ support for I-DEAS, AutoCAD, UG, Pro/E, SolidWorks, other CAD systems
- ◆ searching and accessing data across multiple CAD team sites
- ◆ attach Microsoft Office files to design data
- ◆ price includes first year maintenance, enhancements and support

And when you're ready for even more productivity, you can build from this base to add a number of I-FIND extensions including:

- ◆ creating 2D/3D supplier data packages
- ◆ originating engineering change orders
- ◆ synchronizing multiple team sites
- ◆ BOM exchange with ERP/MRP systems

And you can purchase, download and install I-FIND, online, today! Before you know it, I-FIND will be broadening the enterprise horizons at your site!
