Fields of expertise

Conceptional: planning, analysis, specification

Deployment: process consulting, training

General: project management, documentation

Abstract

The employee has a 10 years' experience with the conception, introduction and operation of CAD and PDM solutions in industrial environments. Has led engineering design teams. Strong background in engineering design methodologies, especially part classification, strategies of variety reduction, and process engineering.

Skill profile

Programming languages	C, C++
Operating systems	UNIX (IRIX), NT
PDM systems	Metaphase, MetaKON
Other applications	ObjectD, SolidWorks, SAP R/2, Pro/E
Other skills	Controlling, standardization, technical writing, patent management, engineering design, process analysis
Hardware	PC, UNIX Workstations (SGI)
Foreign languages	English (extendable) Russian (fluently)

Profile: 002
